

ANOTHER WITNESS TO THE ELENCHI-QAESTIONES OF RADULPHUS BRITO

Sten Ebbesen & Jan Pinborg

The Ms. Erlangen, Universitätsbibliothek cod. 194 is a 14th century codex, containing copies of Aristotle's logical works (cp. Aristoteles Latinus. Codices. N^o 912). The folios 1 to 45 offer the Sophistici Elenchi. The text is annotated in a number of different hands. Among these one late 14th century scholiast has written extensive extracts from the Quaestiones on the Sophistici Elenchi by Radulphus Brito (cp. Cahiers 10, 1973, 32f., 46), all headed by a 'Brito'. Such scholia are found in the margins of folios 1^r to 8^v and give the Corpus and the Ad rationes of the quaestiones 4-19, in substantially the same wording as that offered by the Bruxelles Ms.
